I'm a software engineer
student at
ADISS ABABA UNIVERSITY

[View details](#)

personal detail

I am a third-year Software Engineering student at ADDIS ABABA University, passionate about leveraging technology to solve real-world challenges. With a strong foundation in programming and software development, I am keenly interested in areas such as artificial intelligence, web development, and data analytics. I thrive on collaborating with teams to create innovative solutions and continuously seek opportunities to expand my skill set.

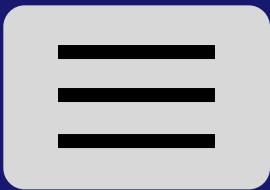

My goal is to contribute to impactful projects that enhance user experiences and drive technological advancement

EYERUSALEM

Welcome to my journey

Family

Our journey began with a simple dream: to create a home filled with joy and warmth. As parents, we were determined to foster an environment where our children could explore their passions and feel supported in every endeavor. From the moment our first child arrived, our lives transformed into a beautiful whirlwind of discovery.

Work Experience

I have three years of experience as a tutor, which I began in 12th grade. During this time, I have honed my skills in teaching and mentoring, helping students understand complex concepts and succeed academically. This experience has not only strengthened my communication skills but also deepened my passion for education and technology.

Education journey

I began my educational journey at Bole Community School, where I laid the foundation for my academic pursuits. Following elementary school, where I developed a strong interest in technology and problem-solving. My hard work and dedication paid off when I successfully passed the entrance exam for university, leading me to pursue a degree in software engineering.

My education journey

high-school journey

I began my educational journey in the Bole community, where I completed my high school education. Throughout high school, I was a dedicated and hardworking student, consistently striving for academic excellence.

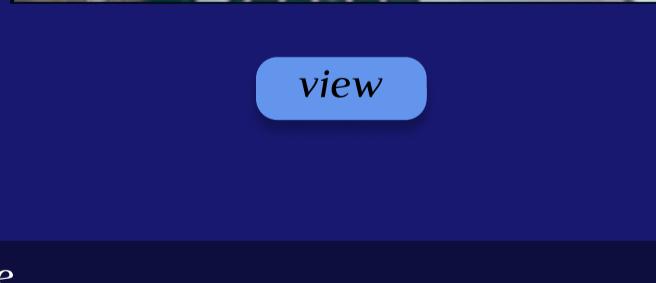

university journey

Currently, I am a third-year Software Engineering student at Addis Ababa University. My studies have deepened my understanding of technology and equipped me with essential skills in software development and problem-solving. This academic path has allowed me to engage in various projects, enhancing my practical knowledge and preparing me for a future in the tech industry.

My project

I have worked on numerous projects throughout my academic journey, each enhancing my skills and knowledge in various areas of technology. These projects have allowed me to apply theoretical concepts in practical settings and develop solutions to real-world challenges. I thrive in collaborative environments, and my experiences have strengthened my ability to work effectively in teams. Each project has fueled my passion for innovation and problem-solving, and I look forward to taking on new and exciting challenges in the future.
